ALON SYSTEMS PRESENTS
FAXALON™

Simplify your faxes

FaxAlon™ is the solution for efficient faxing functions. You can fax directly from each computer without first printing the document. FaxAlon™ receives all incoming faxes, which can then be previewed, forwarded to email or printed. It will save you time and reduce or eliminate your fax costs. Because FaxAlon™ saves you paper and ink, **owning a FaxAlon™ contributes to conserving the environment and your budget.**

Incoming Faxes

FaxAlon™ directs incoming faxes to any email address. It can be configured to send email to specific addresses based on the incoming fax line or the fax can be forwarded to an attendant for email distribution. **This helps maintain confidentiality of your sensitive documents.**

Because faxes can be forwarded to other people as attachments in email messages, home or mobile workers can receive their faxes in a timely manner.

Faxes can also be used immediately in other documents, edited or revised (using OCR), or simply saved for future reference.

Outgoing Faxes

Fax from any workstation on the network by simply selecting the fax device from printer options, or email out faxes with attachments.

No per user licensing

There are no client licenses for any feature on FaxAlon™. Every company and organization, those with 5 and those with 1000 users, can get a FaxAlon™ appliance for a great price.

The FaxAlon™ Advantage: Turnkey Operation

Because The FaxAlon™ appliance is designed for users who are not trained to be network administrators, your business can be connected and increasing productivity in as little as 15 minutes. Simply plug it in, connect to your network, answer a few simple questions and you are on your way.

The FaxAlon™ is truly a Fast, Affordable, Reliable, Simple and Secure Fax Solution.

Detailed features:

- Use any application on your PC to send a fax just as easily as you would send a document to a printer
- Use your current address book
- Choose from a list of preset Fax Cover sheets or choose not to use one at all
- Add comments to the chosen Fax Cover sheet on the fly.
- Block junk faxes
- Receive an email confirmation that your fax has been sent successfully
- Preview incoming faxes before deciding on their final destination
- Forward incoming faxes to email or a printer
- Maintain confidentiality by routing incoming faxes to different destinations based on the incoming fax line or by allowing one attendant to forward via email
- Store incoming faxes on the FaxAlon™ server
- Manage multiple fax lines with a single FaxAlon™ server
- Manage all fax functions from a single desktop
- Send emails directly to fax
